

Examination Requirement for Deep Learning Final Exam Projects 2026-2027

1. Required Submission

- Project Report (PDF): 10-15 pages, excluding References and Appendix.
- GitHub Repository: complete source code for data preparation, training, evaluation, and inference/demo.
A complete README must provide installation instructions and steps for reproducing the main experimental results.
- Dataset Information: dataset link and DATA.md are required.
A complete DATA.md must provide official dataset URL, dataset version, data split, preprocessing procedure, and scripts required to reproduce the data used in the experiments. If the group creates a new or processed dataset, a downloadable link should be provided.
- **Required submission is performed by Group Leader** via Google Classroom of the course. **Deadline is 8:00am, 7th October, 2026**

Format of file and repository names:

Report: GroupID_ProjectID_Report.pdf

Repository: DL2026-GroupID-ProjectID

2. Examination Format

Component	Duration	Main Focus
Project Overview	3 minutes	- Prepare 4 slides as following: - Slide 1: Problem & Research Question - Slide 2: Method & Experiments - Slide 3: Key Results - Slide 4: Conclusion / Demo - Each group chooses one member to present project overview - No more than 3 minutes is allowed. All groups will be asked to stop after 3 minutes.
Q/A examination	12 minutes	- Examine the understanding of quantity and quality of work. - Questions may be directed by examiners to any team member for answering.

3. Project Report Template: 10-15 pages, excluding References and Appendix

Order	Component	Requirements
1	Abstract	150-200 words
2	Introduction and Research Question	0.5-1 page
3	Related Work	0.5-1 page
4	Dataset and Data Preparation	+ A link to official dataset URL and version is required

5	Methods	+ Baseline Method + Main Method + Comparison Strategy
6	Experimental Setup	+ Setup1 — Baseline vs Main Model + Setup2 — Main Research Experiment + Setup3 — Analysis / Robustness / Ablation Experiment
7	Results and Discussion	+ Reporting results without interpretation is not sufficient.
8	Error and Qualitative Analysis	+ Report error cases + Analysis the reasons
9	Conclusion and Limitations	+ 0.5 pages
10	References	Cite approximately 5-10 relevant references
11	Appendix	Member Contribution Table is required
